**B**adanbas is one of Malaysia's largest coach builders offering one stop solutions for delivering top quality buses, coaches and special purpose vehicles.

A pioneering coach builder with over 30 years of experience, Badanbas was re-established in 2001 by **Tan Sri Dato' Seri (Dr) Mohd Nadzmi Mohd Salleh** that appointed a new management team with a refreshed vision to build to international standards.

Proudly partnering Bus & Coach International (BCI), one of Australia's largest bus and coach builders, **Badanbas** elevated its skills and capabilities towards meeting Australian Design Rules (ADR) and achieved ISO 9001 certification to emerge as a world class manufacturer. **Badanbas** have over the years have delivered multiple variants of coaches from express, midi and CNG buses to customised mobile clinics, libraries and mobile counters for both government and private organizations.

**Badanbas** prides itself in manufacturing coaches and special purpose vehicles that are synonymous with innovative designs, reliability and utmost safety standards.

# ABOUT US

**Badanbas** has been the largest coach builders in Malaysia for the last 3 decades, primarily involved in manufacturing and assembly buses, coaches and special purpose vehicles. Further to this **Badanbas** is also involved in assembly of chassis for OEM's such as Daewoo.

Within its 52 acres one stop manufacturing plant, each and every coach building aspect of super structure buses, is handled in house and attuned to world-class standards of safety and excellence.

## HISTORY

**Badanbas**, which started operations in 1977 previously under MARA Holdings Sdn Bhd, was re-established in 2001. Through the strategic planning by its parent company **Nadi Corp**, **Badanbas** has come leap and bounds from its humble beginnings. In 2004 **Badanbas** produced initially 40 super structures that gradually increased in numbers and vehicle types that included special purposed vehicles.

## MISSION & VISION

**Badanbas** is expanding its vision to cultivate world class manufacturing standards in partnerships with regional countries. Backed by its proven reliability in building to international standards, **Badanbas** is focused on expanding its presence regionally and providing greater opportunities for growth with neighbouring economies.

# MANAGEMENT TEAM

**Badanbas** is owned by **Nadicorp Holdings Sdn. Bhd.** an investment holding company with a stable of 23 operating subsidiaries engaged in various activities. With a workforce of over 200 people **Badanbas** is managed by team of dedicated professionals.

Under the leadership of Ybhg. **Tan Sri Dato' Seri (Dr) Mohd Nadzmi Mohd Salleh**, **Nadicorp** has grown to become one of the largest private Bumiputra conglomerates today. Nadicorp has 5 main business units, mainly Transportation, Manufacturing, Property & Plantation, Defence and other support services.

**Tan Sri Dato' Seri (Dr)  
Mohd Nadzmi Mohd Salleh**  
(Executive Chairman, CEO)

**En. Badrul Bin Abdul Rahman**  
(Director & General Manager)

**En. Rohaizad Bin Abu Bakar**  
(Director Administration,  
Purchasing & Procurement)

## OUR PRODUCTS & SERVICES

**Badanbas** is involved in a variety of products and services under its stable. From manufacturing to marketing of buses, coaches and SPV's, **Badanbas** is truly a one stop solution for multiple client segments.

- **Manufacturing of Buses, Coaches and Special Purpose Vehicles**
- **Refurbishment and Repairs Services**
- **Marketing and Sales for Commercial Vehicles**
- **Aftersales Service & Support**
- **Spare Parts**
- **Warehousing**

## TECHNOLOGY & FACILITIES

Every **Badanbas** vehicle features the use of advanced materials such as carbon fiber roof, galvanised steel structure and aluminum panels. These structures is in compliance with UN ECE R66 Rollover Test. To achieve higher strength, **Badanbas** produces monocoque galvanised rolled hooves with minimal joints and welding. All these features are put through a stringent design and development phase leveraging on our 54,000 sq. meter manufacturing plant with facilities that includes a management & admin center, training labs, design lab, centralised workshop, spare parts warehouse, dry type paint booth, maintenance and refurbishment workshop. Further to this our stringent quality control requires all vehicles to undergo stringent quality checks including shower test and final inspection.
